

**Do you feel we are being duped? This book is for you.  
Keen to uncover a sack of secrets? This book is for you.  
Want to know the truth about the world we live in?  
This book is for you.**

**The author, Lucinda Clerk, an English retiree living in New Zealand, started this diary and part-memoir in 2016 as an attempt to understand the state of the world, both home and abroad, from a political and social standpoint.**

**She ends up going down several rabbit holes, becoming lost in some and finding underground complexes in others. As she travels globally through the years to 2024, conspiracy 'fake' becomes conspiracy 'fact'. A terrifying global agenda, of which New Zealand is a part, becomes apparent.**

**She weathers the COVID/vaccine debacle, discovers hidden information on secret societies, NASA, weather modification, and AI. She delves into the history of the Jesuits and elite bloodlines, and she eventually discovers the Hegelian dialectic and Agenda 2030.**

**Interspersed with global events are dramas of family life and times spent at her Pacific holiday home on Waiheke Island, off the coast of New Zealand.**

**She discovers we are not alone in the Universe. Will she get a tinfoil hat for Christmas?**
